PROFILE

Geological Engineering graduate with years of experience conducting various geological studies to acquire critical insights for environmental conservation, energy resource optimization, and other geosciences projects. Managed to evolve more towards tech roles besides Geoscience, starting from Software Developer role. Also, being further enhanced by knowledge in relation to AI / Machine Learning, Data Science and Analysis, ready to tackle complex challenges in the digital domain on Geoscience and Engineering in the Future.

FORMAL EDUCATION

Bandung Institute of Technology

Indonesia

Bachelor of Science in Geological Engineering

(Graduated Year: 2022)

Final Project : “Geology and Hydrogeology of Kumanis and Surrounding Areas, Sawahlunto City and Sijunjung Regency, West Sumatra Province”

GPA : 3.12

INFORMAL EDUCATION AND TRAINING

Dicoding Bootcamp

Indonesia

AI Web Development Program, Batch 12

April 2026 – June 2026

Related Coursework: Product Designing and Requirement, Tech Stack for Web Development Requirement, JavaScript (Node.js. Express.js), React Web Development, Fundamentals of AI – ML Development, AI Integration, Testing and Observability, CI-CD and Deployment

- With expert mentors from top companies in their respective fields, and various topics around software development and applications of software developments to learn from the scratch
- Team-based capstone project, building interactive AI-Integrated App Product for Final Project. Role: Vice Team Leader. Task: focusing on Human-In-The-Loop (HITL) mechanism enhancement design and implementation
- Utilized expertise in Software Development, HTML/CSS/Javascript, React Web Development, AI Integration Development with Gemini

Dibimbing.id

Indonesia

Bootcamp in Back End Golang, Batch 3

Jan 2025 - July 2025

Related Coursework: Web Development and Basic Programming Algorithm, JavaScript (Node.js. Express.js), Go Language, Database Management System (SQL, NoSQL), Git, API Development with Go Language and Web Server, Deployment, Microservices, CI-CD

- With expert mentors from top companies in their respective fields, collaborating with industry,
- Redesigned back-end server app, implementing enhanced API routing design elements
- Utilized expertise in JavaScript, Go Language, SQL (MySQL), RestAPI, Docker, Microservices, acknowledged by stakeholders

PROFESSIONAL EXPERIENCE

Full Stack Developer | AccelWorks

December 2025 – March 2026

- Developed and maintained ERP modules for inventory & procurement, contract form, user access control, and document & asset management using Go (backend), React/Next.js framework (frontend), and Python (AI-ML)
- Built REST APIs in Go to handle core business logic across ERP modules, ensuring reliable data flow between services and consistent system behavior
- Implement bug fixing and necessary restructure of React UI components for internal ERP interfaces, supporting day-to-day operational workflows for end users across departments within various modules
- With team consisted of various background with Lead Engineer direction, conduct any task and software enhancement rigor with Agile-Scrum method by using task management tools available

Geologist | Yayasan LAPI ITB

January 2023 – July 2025

- Updating and reconstruct regional and local geological data from the previous geological and hydrogeological study
- Conducting subsurface well log data analysis for analyzing certain aspect of one field to determine safe groundwater drilling area respectively with groundwater aquifer zone
- Complete Study of subsurface model on spread of contaminant and Total Petroleum Hydrocarbon (TPH) rate based on laboratory results and its physical evidence as in Groundwater Contamination Study report,

Freelance Geologist | Geochem Survey Internasional

May 2022 – Dec 2022

- As a field geologist / engineer and field coordinator of the survey team
- Coordinating with clients with various backgrounds in relation to the technical side of data acquisition, such as administrative tasks and permit to work.

SKILL

Language:

- Bahasa (Native)
- English (Conversational, TOEFL ITP: 539 (CEFR B1); EF SET: 63 (CEFR C1))

Soft Skill: Time and Project management, problem solving, team work, interpersonal and intrapersonal skill, loyalty, critical thinking

Hard Skill: MS Office (Excel, Word, and Power Point), Email (Outlook, Gmail), Google Suite (Docs, Form, Sheet, and Slide), Corel Draw, Petrel, Survival Skills, Field Geological Mapping, GIS Software (ArcGIS, QGIS), AWS EC2, etc.
